STEUK GRAPE-VINE NURSERY

R. F. D. No. 2

Phone: 3338-R-2

SANDUSKY, OHIO

U. S. Department of Agriculture

PRICE LIST - 1951

The following varieties at 75c each; 55c each for 10 vines or more:

✓ Athens	✓ Keuka	Seibel 1000✓	Seibel 13047✓
✓ Bronx Seedless	✓ Muench	Seibel 5279✓	Seibel 13053✓
✓ Buffalo	✓ Ruby	Seibel 5296✓	Seibel 15062✓
✓ Brocton	✓ Schuyler	Seibel 5409✓	Seyve-Villard 5276✓
✓ Concord Seedless	✓ Seneca	Seibel 6339✓	Seyve-Villard 12309✓
✓ Dunkirk	✓ Steuben	Seibel 6905✓	Seyve-Villard 12364✓
✓ Eden	✓ Van Buren	Seibel 7053✓	Seyve-Villard 12375✓
✓ Ellen Scott	✓ Baco No. 1	Seibel 9110✓	Seyve-Villard 14287✓
✓ Kendaia	✓ Bertille-Seyve 2862	Seibel 10096✓	Seyve-Villard 20347✓

The following varieties at 45c each; 30c each for 10 vines or more:

✓ Brighton	✓ Diana	✓ Iona	✓ Ontario
✓ Caco	✓ Early Catawba	✓ Isabella	✓ Portland
✓ Champagne	✓ Elvira	✓ Lindley	✓ Salem
✓ Clinton	✓ Eumelan	✓ Lucile	✓ Sheridan
✓ Captivator	✓ Gaertner	✓ Lutie	✓ Urbana
✓ Delaware	✓ Goethe	✓ Missouri Riesling	✓ Vergennes
✓ Dutchess	✓ Golden Muscat	✓ Norton	✓ Westfield

The following varieties at 35c each; 20c each for 10 vines or more:

✓ Agawam	✓ Catawba	✓ Ives
✓ Beta	✓ Diamond	✓ Niagara
✓ Concord	✓ Fredonia	✓ Worden

GUARANTEE—Great care is exercised to have all vines true to name, however, if vines prove to be untrue, will replace or refund purchase price. It is mutually understood between purchaser and ourselves that we shall not at anytime be held responsible for a greater amount than the original price of the vines.

Many of the varieties listed are in limited supply. Orders will be filled in the order they are received.

We pay all shipping charges except on large quantities of vines at special prices and except beyond the fourth zone. Shipping season up to June 1st but early planting is recommended.

Some varieties are available in large quantities; write for special prices on these.

Payment by check or money order. C.O.D. orders not accepted. We will accept a deposit on an order and hold until shipping time but require payment in full before making shipment.

Due to handling and shipping costs we cannot fill orders for amounts less than \$2.00

DESCRIPTION OF NEWER VARIETIES

NEW YORK STATE AGRICULTURAL EXPERIMENT STATION INTRODUCTIONS

Interlaken Seedless—White, berries small, clusters medium sized. Ripens about one month before Concord. The vine is of fair vigor and compares to Delaware in hardiness. The fruit is sweet, the flesh crisp and adheres to the skin. This is a promising seedless grape for Eastern United States.

Steuben—Black, berries medium size, clusters long and tapering. Ripens with Concord. The vines are vigorous, productive, and winterhardy. The flavor is sweet and free of foxiness. It is considered to have commercial possibilities.

FRENCH - AMERICAN HYBRIDS

Seibel 5279—White, berries small, clusters small to medium. Ripens early. Vines of average vigor. Fruit has a spicy flavor and melting pulp. A grape of promise, especially for regions of short growing season.

Seibel 5296—Pink, berries small, clusters long and compact like Delaware. Ripens early. Vines of average vigor. Primarily a wine grape, fairly high sugar and medium acidity. Wine is entirely neutral and vinifera in character.

Seibel 7053—Black, berries medium in size, clusters large and compound, very attractive. Ripens midseason. Vines vigorous and productive. A wine grape of considerable promise.

Seibel 10096—Black, berries small, clusters very large, long and compact. Ripens midseason. Vines of moderate vigor. This is strictly a wine grape, but a good one when adapted to the region. The vines should be spur pruned because the huge clusters permit maximum production on fewer buds.

Seibel 15062—Black, berries and clusters large. Ripens midseason. Vine of average vigor. A good table and wine grape entirely European in flavor.

Seyve-Villard 12309—White, berries of medium size, clusters very large and loose. Ripens late. Vines very vigorous. Primarily a wine grape.

Seyve-Villard 12364—Black, berries medium, clusters large, broad, and short. Ripens midseason. Vine vigorous and productive. One of the better red wine grapes, has a good reputation in France.

Seyve-Villard 12375—White, berries medium, clusters large and loose. Ripens midseason. Vine of medium vigor. Berries firm and sweet, a table grape with wine possibilities.

Seyve-Villard 14287—White, berries medium, clusters large and compound. Ripens early. Vines of medium vigor. The fruit is entirely muscat in flavor, is pleasant to eat and a striking possibility for muscat wines in Eastern United States.

Seyve-Villard 20347—Black, berries very large, clusters large and attractive. Ripens midseason. Vines of medium vigor but productive. A very good table grape, delicious.

DESCRIPTION OF VARIETIES

Many books and bulletins have complete descriptions of the older grapes and many of the newer ones. We refer you to these sources for the many details concerning varieties and their culture.

However, there are some grapes, new and old, whose descriptions are not at the moment readily available to all. These are the French-American Hybrids, the Munson Hybrids, and recent introductions of the New York State Agricultural Experiment Station.

The French-American Hybrids are a group of varieties developed in France as crosses between American grape species and varieties and the traditional grapes of Europe, *Vitis vinifera*. This breeding started about 80 years ago when the French were attempting to produce new varieties with fruit characters of the European grape but insect and disease resistant vines present in some American species. The program was conducted on a very large scale and is still in progress, so a host have been produced and tested. And relatively a large number are worthy of testing in American vineyards. The fruit of the French-American Hybrids is similar to that of the grapes of California. Very few Hybrids have been named, they are known by the name of the originator plus the identification number he assigned them, thus Seibel 1,000 was originated by Louis Seibel and by him given the number 1,000.

The Munson Hybrids were developed by T. V. Munson of Dennison, Texas from crosses between many American varieties as well as grapes of California. Some of his work seems to have paralleled that of the French breeders for certain varieties have characters similar to French-American Hybrids. Mr. Munson's grapes were primarily developed for the environment of Texas but limited testing has indicated some promise for other viticultural areas.

The New York State Agricultural Experiment Station has grown many thousands of grape seedlings and of these a few have been deemed worthy of naming and introducing. Some have already gained a place in viticulture and others show promise.

The descriptions of these newer varieties are very brief and intended only to barely identify them. We will be pleased to supply further information on any you wish.

Descriptions are as follows:

FRENCH-AMERICAN HYBRIDS

BACO No. 1	Black, berries small clusters large, ripens early, vine extremely vigorous. Juice very sweet has tested up to 25° Brix, a wine grape.
BERTILLE SEYVE 2862	Black, clusters and berries large, ripens late, vine vigorous, a wine and table grape.
SEIBEL 1000	Blue, berries small, clusters medium, ripens early, vine vigorous, has been commercially planted in some areas as a grape for both red and white wine.
SEIBEL 5409	White, clusters and berries small, ripens mid-season, vine vigorous. Has a fine reputation in France as a white wine grape.
SEIBEL 6339	Blue, berries small, clusters large to very large and extremely compact, ripens mid-season, vine of medium vigor. A wine grape.
SEIBEL 6905	Black, berries small, clusters very large, ripens late mid-season, vine of medium vigors. A wine grape.
SEIBEL 9110	White, berries medium, clusters large, ripens mid-season, vine vigor, good. Very promising as a table grape and wine grape.
SEIBEL 13047	White, berries medium, clusters large, ripens mid-season, vine vigorous, a table grape as well as wine grape.
SEIBEL 13053	Black, berries small, clusters long and loose, ripens very early, vine vigorous, primarily an early table grape.
SEYVE- VILLARD 5276	White, berries small, clusters large, ripens mid-season, vine medium vigor. Has an excellent reputation for white wine in France.

DESCRIPTION OF VARIETIES

MUNSON HYBRIDS

CAPTIVATOR Red, clusters and berries large, ripens early vine vigorous. A very attractive and delicious grape.

ELLEN SCOTT Red, berries large, clusters very large, ripens late, vine vigorous, very productive and of fine quality, sugar content has been as high as 26° Brix in Ohio.

MUENCH Black, berries medium, clusters large, ripens late, vine very vigorous. A very productive wine type.

NEW YORK STATE AGRICULTURAL EXPERIMENT STATION INTRODUCTIONS

ATHENS Black, clusters medium to large, berries larger than Concord, ripen one month earlier. Vine very vigorous, quality good, a table grape possibility.

BRONX SEEDLESS Red, clusters and berries large and seedless, ripens mid-season, vine of medium vigor, not completely winter-hardy, berries liable to crack in wet seasons.

BUFFALO Black, clusters and berries medium vigorous and productive but slightly tender to low temperatures, ripens early, good for wine and eating.

DUNKIRK Red, clusters and berries a little larger than Delaware, ripens a bit later, apparently not as widely adapted as Delaware.

EDEN Black, clusters and berries medium, ripens early, vines productive but tender, good for table and wine.

FREDONIA Black, clusters medium, berries large, vines vigorous and productive, quality good, now an accepted commercial grape in many areas.

GOLDEN MUSCAT White, clusters very large, berries medium to large, vines of medium vigor, ripens late. A beautiful grape when well grown.

KENDAIA Black, clusters medium to large, berries large, ripens early, vine vigorous, quality good.

KEUKA Red, clusters and berries medium, vine vigorous but not completely hardy, ripens late, flesh is crisp and adheres to tender skin.

ONTARIO White, clusters large, berries medium, ripens very early, vine vigorous, quality good. One of the standard early white grapes.

PORTLAND White, clusters large, berries large, ripens very early, vines vigorous, quality good.

RUBY Red, clusters medium to large, berries medium, ripens mid-season, vine vigorous. Very good quality, promising.

SCHULYER Black, clusters large, berries medium, vine productive, ripens early, quality good, fruit somewhat resembles Zinfandel.

SENECA White, clusters medium, berries medium ripens early, vine vigorous, fine quality, almost a pure vinifera.

SHERIDAN Blue, clusters and berries large, ripens late, vine vigorous, a good grape where it will ripen.

URBANA Red, cluster and berries large, vine vigorous, ripens late, good quality when ripe.

VAN BUREN Black, clusters and berries medium, ripens very early, quality similar to Concord.

WESTFIELD Black, clusters and berries medium, ripens before Concord, vines not too vigorous in some sites. Juice intensely colored, possibility for wine.
